

### WP6 Deliverables: D6.1 & D6.2

#### Deliverable D6.1 Scientific Exploitation Report

- Aim: Summarise all promotional activities and the main outcomes of Integration Meetings and results and outcomes in other relevant meetings, conferences and workshops.
- D6.1 v1 was submitted and accepted in October 2020, v2 was submitted and accepted in June 2021 and v3 is due in June 2022.

#### Deliverable D6.2 Promotion Package

- Aim: Promote CCI datasets and CMUG results to climate modelling and reanalysis community, international bodies and climate researchers.
- Summarised into a report.
- D6.2 v1 was submitted and accepted in October 2020, v2 was submitted and accepted in June 2021 and v3 is due in June 2022.

### CMUG Website

CMUG's original website has been retired and a new website created. The content from the original website has been transferred over to the new site. The new CMUG website can be accessed [here](#).

WP6 is responsible for the management and upkeep of the CMUG website. The website contains information on project deliverables, scientific engagement, scientific exploitation of CCI data, media outputs, and past and forthcoming meetings and events.

### CMUG Data Forum

The CMUG Data Forum was originally a separate webpage on the CMUG website. The Data Forum consisted of highlights of recent CMUG case studies, general information about the project, links to the CCI data portal, contact links and a FAQ. Instead of a separate webpage, all of this information has now been implemented into the new website in the appropriate areas.

### Outreach Activities

- Blog post 'Satellite data for ocean reanalysis' (available [here](#)) by CMUG member David Ford went live on the European Geosciences Union (EGU) Ocean Science blog on 22 September
- CMUG promoted on [Met Office Science](#) Twitter in multiple tweets in late October, including a CMUG overview, an introduction to ESA's CCI, advertisement for the Open Data Portal and advertisement of the use of Obs4MIPs portal.

### CMUG Newsletters

CMUG produces a newsletter approximately every 6 months to highlight upcoming meetings of interest, such as CSWG or Integration meetings. There have been four newsletters since Nov 2019. The newsletters also outline recent CMUG news and scientific highlights, links to relevant important documents and webpages and recent CMUG peer-reviewed publications.

### Communications

Since Nov 2019, CMUG has transferred its central location for file storing, sharing and transfer to a new SharePoint site which allows collaboration between internal and external partners. In parallel to the new SharePoint, a Microsoft Teams site has been set up to enable collaboration and more effective communication.
