

Improving Exploitation of CCI Data

**Breakout Session
30 September**

**14:14 – 15:45
Report: 16:55 - 17:15**

Co-chairs: Stephen Plummer & Paul van der Linden

Rapporteur: TBC

14:00 - 14:45 Presentations

Opening words (P. van der Linden)

Project views

Exploitation in Cryosphere - David Vaughan

Exploitation of Greenhouse Gases – Michael Buchwitz

Exploitation in Fire – Chao Yue

LPF views

CLIMARECOS - extending from OC to phenology and phytoplankton indicators - Marie-Fanny Racault

Improving exploitation of CCI data: feedback from the LPF postdocs - Anna Maria Trofaier

CMUG view

The value of CCI for Climate Models: Paul van der Linden

14:45-15:45 - Discussion following Guide Questions

1. What is the project experience of exploitation of CCI products?
2. Were CMUG and CRG approaches effective and if not what could we do to improve them?
3. Was the LPF a successful exercise in helping to improve exploitation of CCI products - what could be improved?
4. What alternative could be introduced or improvements made in CCI+?
5. What other exploitation projects, which bring to together multiple CCI teams to address a particular key issue, are needed following the experiences of IMBIE and sea level budget closure project?
